

Home Based Nursing Care

Leaders in Providing High-quality Holistic Home based Healthcare

What we do

At Sage Healthcare we understand that there are instances where a patient will need to close supervision particularly with continuous medication away from a hospital ward. For some patients, the hospital stay can be very expensive while for others their medical conditions may dictate they maintain treatment at home. Our home nursing care service ensures that the patients enjoy a truly hospitable experience as they undergo treatment. This care is usually less expensive, more convenient and just as effective as the care one receives in a hospital.

SERVICES

*Leaders in Providing High-quality Holistic Home based
Healthcare*

At-Home Physician Care

This type of service involves regular house calls made by licensed physicians/Doctors. Whether the appointment is needed to diagnose or treat an illness or injury, it's a beneficial way to ensure that loved ones receive specialized care

Nursing Care

This type of home health care is issued by registered nurses and nursing assistants. Under the direction of a doctor, a caregiver is assigned to the case of a specific patient to ensure the stability and fluidity of treatment. After a treatment plan is designed and approved by a Doctor, the nurse attends to the needs of their patients within the comfort of their own home.

- Post Operative Care
- Rehabilitation
- Clinical Assessments
- Nursing procedures
- Frail Care

Palliative Care

- Palliative Care is an approach that improves the quality of life of patients and their families facing the problem associated with life-threatening illness, through the prevention and relief of suffering by means of early identification and impeccable assessment and treatment of pain and other problems, physical, psychosocial and spiritual.
- At Sage we provide Palliative Care for those people suffering from advanced life limiting conditions, including:
 - Cancer
 - Heart Failure
 - Lung Disease
 - Liver Failure
 - Kidney Failure
 - Multi Organ Failure
 - AIDS

Home Therapy Services

We provide variety of home therapy options, our therapists commonly address issues with mobility, performing daily activities, and speech.

Physical Therapy (PT) is often useful when:

- Rehabilitating from planned surgeries such as a hip replacement, knee replacement, or spinal fusion
- Recovering from unplanned injuries caused by a fall or accident
- Managing symptoms from medical conditions such as muscular dystrophy, stroke, or heart disease
- Maintaining strength and balance to promote independence and quality of life

Our Home-based therapy may be performed by a(n):

- Physical Therapist, Occupational Therapist and Speech Therapist
